

DMITRIY USHKVAROK

Frontend Developer

ABOUT ME

Hello!

I am an experienced web developer with over ten successfully completed projects under my belt. My expertise spans a wide range of technologies and tools, including HTML, CSS, and JavaScript, as well as more modern frameworks and libraries like React, Next.js, and Redux Toolkit. What truly sets me apart is my proficiency in server-side actions, which enables me to seamlessly develop both front-end and back-end solutions within a unified bundle, eliminating the need for separate server-side code.

In addition to traditional web development, I excel in server-side development using frameworks like Next.js 13, allowing me to create full-stack applications where both front-end and back-end functionalities are effortlessly managed within a single environment. This approach streamlines development, enhances scalability, and simplifies the deployment process.

One of my standout achievements is the successful completion of a commercial project to create an e-commerce website using Next.js and server-side actions. This project provided me with valuable experience working in a team environment and allowed me to expand my skills in both front-end and back-end development, all while utilizing the power of server-side actions to deliver a unified solution.

My constant thirst for knowledge and eagerness to grow enable me to stay abreast of the latest trends in web development and experiment with new technologies and programming languages. I also value researching and implementing modern development methodologies, such as Redux Toolkit and RTK Query, to build scalable and performant applications.

Furthermore, I possess excellent communication skills and am adept at working effectively in a team setting. In my free time, I prefer an active lifestyle, engaging in cycling and swimming.

I am looking forward to the opportunity to bring my passion for web development and readiness to learn to a dynamic and innovative team. I am prepared to make an immediate and valuable contribution to your project!

CONTACT DETAILS:

- +38-095-745-36-46
- dmitriy.ushkvarok@gmail.com

TECH SKILLS

- HTML5, BEM
- CSS3, SASS(SCSS) - GIT/Github
- JavaScript
- TypeScript
- React
- Redux
- Firebase
- Rest Api
- Handlebars
- Node.js
- Next.js
- Wordpress
- Php
- Parcel
- Webpack
- Vite
- Figma
- Photoshop

SOFT SKILLS

- Approachable
- Calm
- Cheerful
- Communicative
- Cooperative
- Courteous
- Eager to learn
- Punctual
- Honest

LANGUAGES

- Ukrainian – native,
- Russian – native,
- English – intermediate.

PROJECTS

- My Site Portfolio: my-site-portfolio-three.vercel.app/ I am pleased to introduce my personal website, a meticulously crafted digital platform that I have developed exclusively for my online presence. This website showcases my extensive skills in web development, combining a powerful Next.js frontend with an equally robust Next.js backend, enhanced with server-side actions. It offers a rich and interactive experience, catering to two distinct user roles: "User" and "Admin."

- Link to live code: [\[Next.js, NextAuth, ServerActions Next.js 13, Redux, MongoDB, Mongoose\]](#)

- pigments.com.ua: <https://pigments.com.ua> We developed an online pigment store using Next.js with a team of five developers, including one backend developer and four frontend developers. The project is officially deployed on a hosting platform with a registered domain name.

- Link to live code: [\[Next.js, Node.js, Redux Toolkit, RTK Query\]](#)

- Task Pro: <https://dmitriyushkvarok.github.io/team-project-task-pro-frontend/> TaskProApp is a comprehensive task management web application developed with modern technologies. Our frontend is developed with React and a host of other libraries that work together to offer an exceptional user experience.

- Link to live code: [\[React, Redux Toolkit, RTK Query, Node.js, Vite\]](#)

- Find Pet: <https://dmitriyushkvarok.github.io/test-team-project-react-and-nodejs/> Welcome to the Animal Search Pet Project! This project is aimed at providing a platform for finding, selling, or giving animals to good homes. Users can search for animals, post listings, and connect with potential adopters or sellers. The application offers various features, including search filtering, sorting by title, news section, partners section, and a user account page for profile management and creating animal listings.

- Link to live code: [\[React, Redux Toolkit, RTK Query, Node.js, Vite\]](#)

- Social Profile: <https://dmitriyushkvarok.github.io/social-profile/> I have created a pet project of a social profile with registration and authentication capabilities. The application allows users to view posts from registered users, and the user's profile page displays a collection of posts created by them. Users can create posts with titles and photos, as well as leave comments and like posts.

- Link to live code: [\[React, Redux Toolkit, Firebase, Firestore\]](#)

- Filmoteka on React: <https://dmitriyushkvarok.github.io/filmoteka-react/> a pet project with good functionality and multiple filters to select any movie and actor

EDUCATION

- Udemy: TypeScript for modern development (October-November 2023)

- Beetroot internship: Front end developer

- deepened my knowledge of HTML, CSS, Wordpress, JavaScript, PHP.

- completed commercial project within a deadline

- created a responsive layout (february 2023)

- IT School Golt: Fullstack Developer (July 2022 - June 2023)

- HTML Academy: basic flex and grid layout (2021)

- Dnipropetrovsk National University:

- Specialist Degree, Occupational Safety and Health sept. 2008. - Febr. 2013.
