- Calm
- Cheerful
- Communicative
- Cooperative
- Courteous
- Eager to learn
- Punctual
- Honest

LANGUAGES

- **Ukrainian** – native,
- **Russian** – native,
- **English** – intermediate.

ABOUT ME

Hello!
I am an experienced web developer with over ten successfully completed projects under my belt. My experience covers a wide range of technologies and tools, including HTML, CSS and JavaScript, as well as more modern frameworks and libraries such as React, Next.js , Node.js and Redux Toolkit.
In addition, I have excellent communication skills and am able to work effectively in a team.
In my spare time, I prefer to lead an active lifestyle by biking and swimming.
I look forward to bringing my passion for web development and willingness to learn to a dynamic and innovative team.

WORK EXPERIENCE

- Iced Latte project (open source online store): October 2023 (frontend developer)

- freelancing: July 2023 (fullstack developer)

PROJECTS

-**My Site Portfolio:** my-site-portfolio-three.vercel.app/ I am pleased to introduce my personal website, a meticulously crafted digital platform that I have developed exclusively for my online presence. This website showcases my extensive skills in web development, combining a powerful Next.js frontend with an equally robust Next.js backend, enhanced with server-side actions. It offers a rich and interactive experience, catering to two distinct user roles: "User" and "Admin."
- Link to live code: [Next.js,NextAuth,ServerActions Next.js 13,Redux,MongoDb,Mongoose]
-**pigments.com.ua:** https://pigments.com.ua We developed an online pigment store using Next.js with a team of five developers, including one backend developer and four frontend developers. The project is officially deployed on a hosting platform with a registered domain name.
- Link to live code: [Next.js,Node.Js,Redux Toolkit,RTK Query]
-**Task Pro:** https://dmitriyushkvarok.github.io/team-project-task-pro-frontend/ TaskProApp is a comprehensive task management web application developed with modern technologies. Our frontend is developed with React and a host of other libraries that work together to offer an exceptional user experience.
- Link to live code: [React,Redux Toolkit,RTK Query,Node.js,Vite]
-**Find Pet:** https://dmitriyushkvarok.github.io/test-team-project-react-and-nodejs/ Welcome to the Animal Search Pet Project! This project is aimed at providing a platform for finding, selling, or giving animals to good homes. Users can search for animals, post listings, and connect with potential adopters or sellers. The application offers various features, including search filtering, sorting by title, news section, partners section, and a user account page for profile management and creating animal listings.
- Link to live code: [React,Redux Toolkit,RTK Query,Npde.Js,Vite]
-**Social Profile:** https://dmitriyushkvarok.github.io/social-profile/ I have created a pet project of a social profile with registration and authentication capabilities. The application allows users to view posts from registered users, and the user's profile page displays a collection of posts created by them. Users can create posts with titles and photos, as well as leave comments and like posts.
- Link to live code: [React,Redux Toolkit,Firebase,Firestore]
-**Filmoteka on React**: https://dmitriyushkvarok.github.io/filmoteka-react/ a pet project with good functionality and multiple filters to select any movie and actor
- Link to live code: [React,Redux Toolkit,connections-api]

EDUCATION

- **Udemy:** TypeScript for modern development (October-November 2023)
